

The *DATATRAK One* Unified Experience removes complexities in clinical trial research through our eClinical solutions and services, delivering time and cost savings while safely accelerating the outcome of your trial.

The *Unified Experience* is scalable to any size clinical trial at any stage. It is the foundation of our efficiencies, providing a single data source that powers all *DATATRAK* solutions, eliminating the need for data integration.

Our Technology

With exceptional system reliability built for the Cloud, we minimize downtime, enabling agile mid-study changes, delivered through an intuitive interface. This easy-to-use platform includes a full set of independent solutions that work together in any configuration, providing real-time access to your clinical data, so you can manage all aspects of your clinical study research more efficiently.

Our Services

We offer service and support throughout the clinical trial life-cycle. Backed by decades of industry experience, the *DATATRAK* team will partner with you to understand your research needs, objectives and pain-points, advising you on how to best leverage the power of the Unified Experience. This allows you to make better decisions faster, safely accelerating the outcome of your trial.

Our Expertise

DATATRAK has been leading the way in clinical trial data management for more than 20 years. We are the founders of the EDC industry and have over 100+ years of combined expertise in life sciences. *DATATRAK* combines state-of-the-art software designers with cutting edge Life Science experts, which has led to a high quality, user friendly, and industry leading platform.
